Good evening,

I'm Jaxon, [REDACTED]

I am writing because I've seen all of the boards and posters and I've heard people talk about 'Save The Blean'. I've talked more about it with my Mum and Dad. I've done more research on the website that was made and I understand what could happen.

The wildlife and farmland is an important piece of the Earth because it supports our oxygen. The land you are planning to build on is not a good place to build because animals will not be happy and you'll be wrecking their habitats. Soon they'll be less and less animals, which is very unhelpful, because some animals do really good thing for us. Like the bees, if you take their flowers, we will lose more bees than we already have. If you cut down the trees, you will not only be destroying birds' and squirrels' homes, but also the bats.

Just because the university needs money, doesn't mean that you have to build houses and shops, you could try to raise money by asking people to pay to play sports, like volleyball. Another idea I had, was to sell some of the resources the university owns, for example, pencils, rulers, sports equipment, books, laptops and other things.

Lots of my friends live in the Blean community, their homes will be destroyed and they'll have to move from their wonderful houses. The other parts of the area that you will build over, like the ancient church, which has been there for almost 800 years and the Crab and Winkle Way which my family and I really, really enjoy. So please don't wreck it!!

My mum and I have also created a poster each for the campaign.

Thank you for reading.
