Dear Sir,

I have been horrified to read & to be told of the massive development on ground owned by University of Kent, & it must NOT go ahead, because of several very important reasons.

1. TRAFFIC in Canterbury is making the city very difficult to both live & work in, because very heavy & the town old & narrow buildings, make the roads utterly impassable, & parking of lorries when delivering both difficult & dangerous to those pedestrians on foot, with prams & in my particular case, in a wheel-chair, make getting about very dangerous & difficult! We who make it a city are FORGOTTEN!

2. Canterbury is in the midst of a dry patch of land, & the development will need an awful lot of WATER - where is it to be got from to supply the housing? How will the effluent from those houses be dealt with if the water can be supplied - at a great expense as it will have to be piped a great distance.

3. Who is the housing for? young people like my nephews would LOVE to welcome B&B the price of housing is well above their pockets, so retired people they need CARE to get about, they need CARE - the hospital round here are OVER

sketched & needed staffed - I know, as I
have had to wait seven years for an
operation to my leg to remove a cancerous
carcinoma, & it made me very unwell
waiting, as I had to do!

4 Right next to the development is the
very important Wilder Blean natural
(+ very important Reserve with Bison living
there, & doing well to replace & restate
the land as it should be, with many
people's years of hard work just
beginning to show, do what we have
struggled to get, & to save our wild
heritage before it's lost for ever.
You must NOT allow this develop-
ment to go ahead, & as a Kent
Wildlife member & supporter I am
very very angry to see this - it
has been rejected before how so
NO NO to its being allowed.

I am a former farmer, & I know
sick land when I see it - the
marsh - will be MANY years in
recovery, the poison will poison
the water for MANY years to come.
THE MAIN REASON - NO
