Dear Sir or Madam

I am writing to share with you my opinion on the possible development in Blean Woods area of Canterbury.

I am amazed that the CCC are even contemplating building of any description in this beautiful area under your distraction. To be even thinking of building here is a complete disgrace. We need green areas to absorb the massive carbon dioxide in the area. We need these spaces for people to enjoy health wise and for mental health. We have more than enough development in this area of Kent. Faversham is over developed already, whitstable is also over developed and Canterbury will eventually just become a concrete jungle. I really feel extremely worried for my grandchildren.

The NHS is under extreme pressure in these areas -

Are you going to build a new hospital to cater for the extra thousands of people that will be in the area it's currently impossible to be treated quickly in A&E in Margate I know from several experiences with friends.

Where are the new doctors surgeries

Where are the new schools

Where is all the sewage going to go currently a massive problem in this area.

You have built houses in and around Herne bay - are there any solar panels on any of these houses?

You are building in the whitstable are - again are there any solar panels on any of these houses?

We need green spaces, build in the centre of the towns Canterbury has many empty buildings Debenhams, Nasons etc.

Does CCC really want more houses built where Herne Bay, Whitstable and Canterbury will soon just become one giant city.

I am so angry and absolutely oppose to any more development in the CCC areas especially in Blean. This is a beautiful place and we, the residents in the area need and enjoy on a regular basis.

Also where are all trees you were going to plant in White friars all those years ago. You say you want to become carbon neutral so plant trees, make builders put in solar panels, no permission without this.

Other European countries have a very different approach to building,

Infrastructure First and foremost

Solar panels on all new buildings

Never build in green areas

Provide new hospitals

Schools etc first

This country and CCC is a disgrace,

Yours Caroline Rogers
