To whom it may concern

I object to the Brooklands Farm Development on the grounds of:-

- > overdevelopment of the surrounding area
- > increase of surface water flooding
- > insufficient infrastructure
- > increase of sewage in an already over stretched service increasing the threat of even more over spills into the sea
- > impact of increased traffic on the local roads which are already in a poor general state of repair
- > higher demand/pressure on an already over stretched healthcare service
- > increase demand on water supply which is already limited in summer months
- > impact on residents wellbeing with the addition of extra light, noise, traffic pollution
- > negative impact on local nature and biodiversity

Please register my objections of the Brooklands Farm Development.

Yours Mr Keith Potten
