Sir, Madame,

When will all the building STOP!! I object to the contued building in our beautiful area of Whitstable/Tankerton/Chestfield.

There is no infrastructure in the area to support additional housing, the area is struggling as it is.

Flooding and current overspill of sewage is diabolical as it is this will only get so much worse, putting people and property at risk.

The traffic is at a standstill currently with constant roadworks, the roads are left until they are so bad that they are damaging our cars, maintain them so they don't get in such a terrible state

Impact to our wildlife which struggles as it is, the biodiversity will be shattered.

Crab and Winkle is a well used footpath/cycle way, there is bound to be huge impact to this area.

There is little or non existent farm land in the Whitstable area, surely we should be preserving it.

Spend money on adapting empty/derelict shops and property to make into habitable homes.
