You don't often get email from [REDACTED]. [Learn why this is important](#)

I **strongly object** to more housing being built in Chestfield the reason I give below:

Overdevelopment in the area already **insufficient infrastructure** to start with examples being hospitals, schools, dentists and doctors the latter already over loaded and hard to get face to face appointments but another 3,000 to 4,000 people into the area will put a strain on all these commodities that the area needs.

Extra demand on **water supply** already limited in the summer months

Flooding issue I lived at [REDACTED] and the back garden and that area joining the fields flooded on a regular basis.

Increase in sewage our **current system** is already beyond capacity discharging more and more into our rivers and sea.

Huge increase in **traffic** with the addition of the slip road off the New Thanet Way not to say the state of the roads which at present are Pot Holed. With extra traffic on the road the **noise and and visual pollution** not an healthy environment it will be taking up all the green spaces which will have a negative impact on human well being and wild life.

This area has done more than its share of government housing policies time for the Canterbury City Council **to stand up and fight for this area** and put forward other counties around the country to do there share of house building.
