To whom it may concern

I'm writing to say how much I object to another 1,400 houses being built in Chestfield. We live in whitstable town center and have seen the changes dramatically to our small town, that can't cater for the growing number of residents. Our drains are Victorian and already struggle with the waste. The Gorrell tank car park is full to the brim and considering there's been ongoing construction work there almost every day for over a year and they still haven't closed it to sort it properly, I'm wondering how long will it be before it collapses? The growing numbers of cars make it impossible to park near our homes, resulting on lots of pavement parking which is obstructing pedestrians and destroying the pavements. Our schools are overstretched with not enough places for our children. I know this first hand as was offered a school in Thanet for my daughter. The amount of green areas that have already been built on is such a concern for the environment. Our town and surrounding areas are being destroyed by all this building work. Our children will have less chances of finding jobs locally and they no way will still be able to afford this so called affordable housing, which will never be a hundred percent there's. Thank you for your time

Maria Ferguson
