I write to you as I object to the plans submitted for the above development.

Whitstable is a small, quiet seaside town and allows for a good quality of life.

With the increase of demands on our infrastructure from new developments like Whitstable Heights our services are no able to cope. Waiting times or lack of service have worsen since the Pandemic and the cut back on funding from Government.

We already have raw sewage in the ocean that affects our famous oysters and seaside attractions. More houses will mean more people that will need healthcare, dentists, water and waste services. More cars will add to the already congested roads in Whitstable and surrounding areas.

More demands for water will lead to more and longer hosepipe bans.

If we keep building on Agricultural land we will become a nation relying on imports to feed us and that will mean higher prices for food.

We are stretched now to get appointments for healthcare and other services and allowing this development will only compound these issues.

Therefore I object to this development.
