Good afternoon

I write with regard to the proposed development of Brooklands Farm and the inclusion of this in the Local Plan 2040.

The lack of infrastructure required to support increased housing in this area and the South East of England is simply not there. Only this week, a burst water main affected the residents of Chestfield that later led to a further burst further down the pipeline. This shows that an already stressed and aged infrastructure is barely fit for purpose to support the current population. It is simply not sustainable to add to this further.

**I object** to further development due to a complete disregard for the lack of infrastructure needed to support this.

**I object** to profit being placed before people and developers not being held accountable for ensuring further housing is supported with robust infrastructure and services. Not just education and healthcare but basic human needs such as water, sanitation and a safe environment to live.

**I object** to the lack of oversight by counsellors when deciding on such matters.

Kind regards

Mrs Melissa French and Mr Paul French
