Re: policy W4 Brooklands Farm

I strongly object to policy W4 Brooklands Farm

- This would destroy good grade agricultural farmland and add to food insecurity in the future, with an increasing population this is a serious concern
 - This forms attractive scenery in the area which would be destroyed
 - There are not sufficient health care facilities for the increased population.
 - The development would result in a huge increase in traffic congestion and pollution from this, the road system across the wider area would not cope.
- This would cause further loss of wildlife when England is one of the most nature depleted countries in the world.
- The sewage systems would not cope with this development, adding to polluted rivers and sea.
 - There is insufficient supplies of water to provide the additional population, this is an area which can suffer from drought.
 - This will add to flooding.

Please add my objection to the list of those objecting

Jane Syred.
