

Reference: Proposed development at Brooklands Farm, Whitstable, Policy W4

From: Mr & Mrs D [REDACTED]

We wish to register our feelings with the planning authority on this proposal and strongly object to any development on this site for the following reasons:

1. This is a greenfield site which should continue to be productive farmland into the foreseeable future for the sake of the country's need to increase food production not reduce it.
2. It would seem the authority is intent on destroying all green spaces in and around Whitstable between the sea and the A299 at any cost.
3. Numerous large greenfield areas are currently being built over in the vicinity at this point in time. When will those in power agree enough is enough. We the public have already seen enough concreting of our precious countryside.
4. There are hardly enough community resources / services to cope with the existing population. How can we simply go on adding more people without a sensible infrastructure in place?
5. Added to this are the often under estimated effects on traffic flow and pollution especially at peak times, potential flooding, loss of amenity space / paths, wildlife conservation and scenic value / countryside views and appreciation.
