

*I strongly object to Policy W4 Brooklands Farm.*

I feel you don't care as long as you get your money by agreeing to this shameful and reckless development, and it boils down to GREED.

Our waterways are already out of control with spilling and pollution, along with the threat of burst mains and sewage NOW.

You know the infrastructure is beyond repair and it will only get worse.

Whitstable can't cope with the massive influx from surrounding houses let alone doctor surgeries, vets, schools, care, local emergency services.

Estuary View can't take on any more patients, along with the doctors, nurses etc. This will never get better; it will get totally out of control – because you don't care.

The roads can't take any more traffic, the roads are a disgrace – traffic congestion. What about the increase in pollution? Air quality?

Public transport can't cope with the schools now – but you don't care. What about security and crime rates? They are getting out of control, and it will only get worse.

Who is going to buy these houses, who can afford them?

Who is going to live in these houses, give it a few years and it will become an undesirable area – but you don't care.

How is Canterbury City Council going to cope with more houses, more people, more rubbish, more everyday problems?

Does that mean our rates will skyrocket?

What happens when it all goes wrong? I will tell you – it will be the honest, hardworking homeowners – but you don't care

Are you going to take full responsibility when it goes all wrong or are you going to deny it?

It's constantly being mentioned that we need to protect our countryside and farms - but you don't care.

Have you ever thought of buying brown belt land, which has previously been developed. Then you are NOT destroying our green land .

Sooner or later, this part of Kent will become a massive sprawl of housing, with no countryside whatsoever!! Save our environment, before it's too late. *Stop this building now – PLEASE.*

Regards  
Mrs C Dunlop
