Re Brooklands Farm Development - I object

As a resident of Whitstable whom lives on [REDACTED] we have had a number of large developments already (grasmere and Duncan down circa 800 units) that have put a huge amount of pressure on the existing infrastructure

The traffic and associated carbon has risen as a result and the lack of schools and medical support from what was a great local health service is on the wain as a result of these developments and the in flux of new residents

The fields that make up Bartlett's farm flood when it rains then add to the problem as we have with sewage waste that is released into the swale and long rock on a regular basis

We need housing but it needs to be affordable and for the families of the local community and also to built in a sustainable and carbon efficient that contributes to local society which this development is not

The area as noted above is already over developed with little to none local infrastructure support in relation to schools a health care

The development will affect local diversity and ultimately the local wild life such as bats, newts, foxes and rodents

The town will be changed for the wrong reasons for ever, farmland will be lost traffic will increase, noise will increase as will local flooding

Stop the development as it's madness and I'll thought out

B rgds
