I wish to object against the proposed development at Brooklands Farmland as more houses makes more sewage more demands on water supply ie hose pipe bans. More cars making traffic and pollution which doesn't help health. Already problems with Doctors and Dentist as not enough spots to go around. If we have more houses not enough infrastructure, schools health services, drainage, roads play areas. Taking away countryside and natural habitat loss of wildlife and agricultural land and giving us tons of concrete together with flooding. I just like Whitstable as it is. Yours sincerely Susan Arnold.
