Save the Blean

26th May 2024

Re: Chapter 2 (Canterbury) Policy C12. University of Kent Development

Dear Sir/Madam,

The proposed destruction of green space would add to the pollution of the area, reduce the wildlife (so beautiful and good for mental health), and contribute to climate change. The Blean is special, it has huge amenity value for local residents and visitors. The proposed development would further overcrowd the roads. The infrastructure of Canterbury is already under strain. We strongly object to the proposed plan.

Yours sincerely

Joyce Epps
