I have lived in South Street for [REDACTED] years in a [REDACTED] on to Brooklands Farm and we STRONGLY OBJECT to the building of 1400 homes on this land. 1. You will be destroying valuable farm land, at the moment there is a large beef herd plus a large amount of corn is grown, which is vital at the moment as there is a world shortage of corn.2. Southern Water cannot cope at the moment without adding thousands more properties.3. Our garden gets flooded at the moment with the run off from South St and the field behind us which is part of the land to be built on being very wet most of the time , not good to build houses on they will sink.4. We have very limited access to health care at the moment, add more houses and it will sink under the pressure. They will not be able to employ that many GP to cover.5. The traffic is bad enough in South Street at the moment add in 1400 houses plus two schools and the congestion will be terrible. You propose more buses but people will still want to use their cars, it will be gridlocked.6. We are supposed to be the garden of England but there will be nothing left in this area the way we are going for future generations only fields of cement. Keith and Jenny Ratcliffe
