

K7+RJP

We agree with everything on the list over the page & most particularly with regard to

█ Road (where we live) - on several occasions recently the traffic has been grid-locked due to too many vehicles using it as a "rat-run". We have witnessed ambulance personnel having to carry patients & equipment a good way down the road to get to their parked ambulance. Beteshoune lane can barely cope with rush-hour traffic as it is - completely unsuitable and impractical for more vehicles coming out of a 300 house estate.

As for the infrastructure with regard to waste water - this is lamentably poor.

Regular emergency measures have been on-going for months, causing disruption for everyone living locally.

The proposed building land is Grade 1 agricultural land - we need to keep it to grow food locally instead of importing from abroad = sustainability
