Dear Sir/Madam,

Ref BROOKLANDS FARM DEVELOPMENT

I object to the proposed development of Brooklands Farm of 1,400 homes.

There is already massive development in The Herne Bay and Whitstable area, this further development will put undue strain on all the infrastructure and services.

The supply of fresh water and sewage removal is already at maximum capacity we have already this past year (2023) had restrictions on the use of drinkable water, also this development would result in further loss of farmland and wildlife habitat.

The development would also put undue pressure on our Doctors, Hospitals and further damage to our already crumbling highways in Kent, the loss of this green space would put undue pressure on local health as more polluting air is released into the surrounding areas. Please stop this development before it's too late.

Thankyou for your kind attention.
