Policy C12 – Land to the north of UKC

I have lived in Tyler Hill since [REDACTED] and have been tree and pond warden for the past [REDACTED] I am very familiar with this area.

I object very strongly to this application on all points:-

Location: Need: Density: Water: Sewage: Light: Noise: Air: pollution

The reckless destruction of all the natural habitats.

The wanton disintegration of the harmonious characters of four ancient settlements.

This land should remain agricultural.

So much for THE University in the Garden of England.

Suburbia is where they cut down all the trees, build a lot of houses, and then name the streets after the trees.
