To whomever gets this email, in regards to the District local plan 2040 = Brooklands Farm Section - Chapter 3 Policy W4 .

My self and my parents both agree to the Objection of destroying the area and everything that comes with it - Farms, Wildlife, Nature etc. It's not wanted or needed when there currently issues with Farmers Loosing to Imports and if Imports die out and we have no farmers to feed us - we'll be back to needing food ships importing like the Great War and WW2 when everything hit the fan.

there are further issues that can rise sadly and that's more traffic - more rises in pollution which will bring all those whom protest about everything which won't help us locals, with more pollution anything can get worse for those with breathing problems.

what we don't need is hose pipe bans caused by family's and their kids wasting water or owners wasting for no reason.

more sewage issues causing more rises in trying to deal with it all and sadly that leads to then needing plants to clean that water to put back into drinking water and into the rivers and ponds etc.

loosing the countryside is never a good option, it's far better to use land of which where a former warehouse or warehouses sit/sat to which would better suite to building once again. for ensample in Medway where I volunteer - there are areas of which are former sites cleaned up and built housing, dentists, nhs buildings etc. and even in the middle of the Medway Port/Docks to have more of everything.

surely where there are industrial sectors or former sectors in need of revamping and helping those run down area's could be of better use, away from the countryside but' in towns or outer towns where barely any shops exists where if bringing the aspects of bringing in more income for those areas and more money to everyone and onto then the council, those wanting to invest and then helping our country too.

I have Autism - mental health etc. , my dad COPD and much more and my mum has her health issues to (both elderly and former British Army Medical's and former NHS workers - I'm a full time volunteer for Medway Watersports doing what areas' here in Whitstable and Sea Salter don't provide).

I'm sure your office is being sent these kind of emails saying the same thing of We or I Object.

I don't know if I will get a reply or not, but' anyways thanks for your time,

Andrew Haynes.
