Dear Sir

Brooklands Farm proposed Development

I object most strongly to the above. The sewers will not cope. There will be more flooding during the winter & even more water shortages in the summer. There is already heavy development on both sides of the throat way & you are turning the area into a concrete jungle. The traffic increase will be considerable & is heavy enough at the best of times.

Healthcare will suffer as will doctors dentists & hospital who cannot cope with current demands.

You are already driving out the wild life in the area & this will get worse. The area is already over developed. Let us retain our countryside & safeguard our services. The whole thing will be a disaster.

Please take this seriously & do not proceed.

Yours sincerely
