Dear Sir/Madam,

Objection to housing proposals at Brooklands Farm, South Street

As I'm sure you have lots of feedback and reasoning on objections to this proposal I simply list my objections below:

- Loss of yet more agricultural farmland. Once you've concreted over it all, it'll never revert and will be lost for future generations.
- Loss of our green landscape forever. You are concreting over it all! What future does this offer my generation and my childrens?
- Years of building work, noise and air pollution, traffic and heavy goods vehicles driving down unsuitable and fragile roads.
- Further local flooding risks as rain runs off concrete footings and roadways. Shocking lack of absorbing open land.
- Lack of proper sewage provision. More will "leak" into our precious waters and coastlines.
- Future water provision – where will it come from?
- Insufficient parking provision within new developments. Additional parking will make South Street impassable and access to Canterbury will be further hindered.
- Huge impact on already struggling supporting services and provision.
- Rich developers, lining their pockets, with no local interest or conscience.

In summary I am feeling let down by my Council who should support me and my local area as a resident. I'm irritated and frustrated by this inevitable forthcoming disaster for South Street and Chestfield.

Yours faithfully

Lucy Dobbie
