Dear Sirs

I am sending this email as I am very concerned the damage this proposed development will have on our community.

I object because the doctors are so overwhelmed with patients , where we are having to wait weeks if we want to make an appointment or telephone in the morning and wait for ages to be told there are no more telephone or face to face appointments. The hospital appointments are taking months to come through because they are also overwhelmed.

I object to the extra sewage the new development will bring which is frightening. The beach at Tankerton is often a no go area because of the sewage washing up onto our beautiful beach.

I object to the development as it will also cause the already old and damaged water pipes to further erode. This will cause more water shortages and hosepipe bans.

I object to the extra volume of traffic. This has already doubled due to other new developments either in Whitstable or the surrounding areas. The proposed development will bring at least another two to three thousand cars onto our roads causing more pollution and damage to the environment.

I object to losing the agricultural land which is fantastic for Whitstable's countryside and the wildlife it encourages, this will all be demolished and covered in hardcore and concrete.

Please please take my concerns into consideration along with my family. We are very worried about this development being allowed to go ahead. We love this area, it has been a wonderful place to live please don't let the developers ruin it, they are only concerned about making money, not what damage it can do the environment and the community.

Kind regards

Hazel Hills
