I am writing to object to Project Policy C12 Land North of University of Kent-proposed build of 1806 new houses in Blean, near Tyler Hill)

You are contradicting your own policy with no infrastructure to cater for such a large plan, the roads can't take the amount of traffic which will arise from so many houses, the town and surrounding area will be gridlocked, how can water supplies cope, the sewage system can't cope now with sewage being dumped in the streams and sea, it would be 10 times worse, gas and electricity supplies, doctors, hospitals, schools, the list goes on, you would be destroying land which could be used for farming, ancient woodland and wildlife being destroyed there are so many housing developments already being built in such a small area, how is this area of Kent have so many housing projects being given the go ahead, it can't support anymore being given the go ahead.

My name is Deborah Rigden, I live at [REDACTED]
I'm absolutely amazed that project W4 Brookland farm is even being considered, as so many housing developments have already been given the go ahead and many are already being built, there isn't the infrastructure to cope with this amount of housing in a small town, lack of doctors, sewage system won't cope, gas, electricity, water, roads, the list goes on, this should not be given the go head, its destroying Whitstable.

Regards Deborah Rigden
