Dear Sir/Madam,

Regarding the application for housing on Brooklands Farmland I strongly object to this proposal. The amount of housing planned will place an enormous burden on our water and sewage system, traffic flow (involving more pollution), possible flooding and a loss of countryside, wild life and agricultural land.

We already have unacceptable amounts of sewage dumped into our sea and rivers - this can only worsen with more housing. Getting a doctor's or dentist's appointment is dire now - again this will only get worse. I would like to know if you have committed to the inclusion of the appropriate amount of infrastructure within the proposal? Any new housing development needs to include adequate water/sewage facilities, traffic control, doctors, dentists, schools, shops, bus/train services and open space/play areas for children and adults alike.

I do hope that you will take on board the detrimental effect this would have on the character and community of Whitstable.

Yours faithfully,

Jenny Koukoulis
