I can not even think how this plan has been put together, listen to the local Whitstable residents, no one wants anymore development in the area the town and roads and sewage can not handle it.

Significantly increased traffic on local roads
whitstable already comes to a stand still with the existing traffic and the roads are in disrepair.

Swalecliffe sewage works already unable to cope with existing demand
the upgrade of making the pipe longer is not a solution and the sewage plant runs passed it capacity already, each sewage plant should have a total number of houses it has to service and then anymore in the area would need need plants built to service them, new sewage plants should be the 1st thing on any agender.

Water shortages
over the last few years whitstable has had hose pipe bans again the infrastructure can not service its existing residents, any building on green belt land should be for a reservoir to store water and help stop local flooding , these are the basic needs for the community which seam to be over looked by the council just looking to grant housing planning and then charge council taxes.

please listen to the local residents and stop the over development of the area
