I STRONGLY OBJECT TO POLICY W4 LAND AT BROOKLANDS FARM.

My reason for objecting to the proposed development of this land is numerous. However my main reasons are:

To protect the Greenland and its wild life and waterways. Our water ways are already spilling and are polluted. More! Really!

To save my town. Its infrastructure. Which clearly cannot cope at present. Is under huge threat of flooding from burst mains and sewerage already. This is without further additions! It has been common knowledge that the infrastructure of whitstable is already inadequate and antiquated.

Whitstable has expanded beyond its means already and further expansion totally eliminates its beauty and functionality. Doctors surgeries, veterinary outlets, schools, local emergency services.....None of these cope with the quantity at present. This will just exasperate their positions and situations will only get worst

Public transport is already irregular and packed. Again this just adds to the torment.

Security and crime rates are already at an all time high. Another estate will only bring in more undesirables. This is said without contradiction but statistics prove it.

The local highways do not manage to keep the roads in good repair at present and again this just adds to the load

I have lived here all of my life and the town has been swamped in ever expanding urbanisation. Since the 90s in fact. The town has rapidly grown and it has had a negative effect. All round. Again Statistics show the rise of crime online and it is inline with the growth of the town.

Quality of air as the number vehicles is beyond any reasonable explanation. To add another 1400 homes gives potential to at least another 2800 vehicles. Then the servicing vehicles for these new residents.

Serious consideration is required and the people of whitstable and surrounding areas should be heard and listened too.

To even consider this proposal is ridiculous.

Mr Luke Tickel

A local businessman for over 25 years
