After a meeting at stumpy primary school I am writing to say I was shocked to see how much building was going to be maybe built in this small Area. I have noticed since Houses being built by the butchers how much water and heates have happered in stumps and broodcok when it rains it runs down stumpy Hill like a stream. There is no Social Housery or Bungalows for stumpy residents at all. I have lived in stumpy for 76 years along Island Road No 14. I was born

and now live at 35 melcott never
left stony Traffic is the worst I
have very seen all the Houses in
Thonet, Herby, Herden all come
through stony. The Green areas
in stony in disapears rapidly
The Wildlife does not know
whue to go the Foxes from
greenfields walk stony often to
go to the woods along popes lone
nighthales, Hawk rabbits moved
becare of Houses. not what people
can afford The Houses do not
fit in with stony. We all know
people need Houses but in such a
vast amount and none to help
people in there own Comuniti is
shackey. It is a lovely field at
top of Hillbrow R9 and then R5 Bread
and cheese at Westbee and more ceh

Hensden they stopped ages and ago and only built when a house is ordered. They have not all sold in stems and there is water everywhere when it rains. Stem is one of the most used roads in this Area. We do not have a NHS Dentist only 1 school and 1 Doctors who are struggling to take more people. The sewerage work at stems road cannot cope.

Popes Lane is what it is a Lane very busy traffic Flies along there horses as well which are not meant to over a certain weight more Horses would be catastrophic. All these Horses were sorted out on the 2014 census it should be worked out now not go by that the population is not so big now families are not having so many children so it has changed

A happy medium should be sorted between social Properties affordable Hours Green spaces and what people would like in the village and plenty of land for Farmers to plant crops to feed people all over the world people are having problems growing food because of climate change lots of rain everywhere, so everything should be taken into account. Thank you for reading my letter.
