To whom it may concern, I would like to register my strong objection to Policy W4 Lands at Brooklands Farm because the proposed development of 1400 homes will add to the burden of an already over-burdened sewage infrastructure that is unable to cope with existing demand. It will increase the already horrendously high amount of sewage discharge into the sea which has resulted in many cases of serious illness, to myself also.

It will increase traffic congestion when we already experience gridlock, and hence pollution, detrimental to our air quality.

The increase in number of residents will add to the burden of insufficient GP/Dentist appointments, as well as increase demand on school/nursery places, veterinary services, emergency services, hospital beds, Public transport overload, etc..

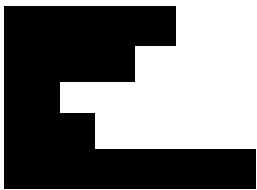

Loss of valuable agricultural land, loss of Whitstable's countryside, more concrete which leads to flooding, diminishes wildlife habitat and biodiversity.

Terrible condition of our roads will be impacted further with increase in car numbers.

I look forward to hearing from you.

Yours faithfully

Genevieve Taylor
