As residents of Chestfield, living at [REDACTED], my wife and I object to both these developments on the following grounds.

The lack of adequate foul water drainage to accommodate these sites, particularly in the light of the new developments at Oxenden Park and Grasmere gardens. Also there is already a problem over flooding in heavy rainfall, and this will obviously get worse with the imposition of such a vast quantity of new dwellings.

The massive impact there will be on existing utilities, which are only just coping now. The strain that will be put on local health provision, doctors, dentists, pharmacists., which are already overstretched. There is no provision to fund any increase in provision.

The strain on local schools, there is no provision planned for when the developments are built, only for something to be planned at an indeterminate and unspecified time in the future. What will happen in the meantime, existing schools will never cope.

No proper assessment of how much extra traffic this will generate in Chestfield, (there will be thousands of additional vehicles to be catered for, and a vast increase in through traffic when new accesses to the Thanet ways are instituted) Also Chestfield is a very residential area and pollution levels will be vastly increased to the detriment of everyone's health.

I saw no answers to these points at the public meeting, and would be glad to hear how they are proposed to be dealt with.
