In keeping with many residents the current plan of "zonal traffic movement" is abhorrent it smacks of the ghetto. The council is responsible for allowing unfettered residential planning well above government requirements in order to fund infrastructure which should have come before new housing. Residents are now faced with traffic planning which has put the cart before the horse. Whether thus is because the council failed to obtain infrastructure funding kn advance if planning is difficult to establish. What is clear is that the Council has boxed itself in it hadn't the funds available to build the roads in preparation for increased development so has now proposed these outrages plans which will result in years to come of worse traffic problems. The public undoubtedly see the latest plans as a problem of the Councils on making decades of lack of traffic management. The current solutions appear to be making a bad issue worse from which there seems no ready solution.

Good afternoon Jackie,

Thank you for your email. I will ensure your comments are reported and considered as part of the consultation process.

All the feedback we receive will be carefully analysed and reported to councillors who will decide what changes should be made to the draft Local Plan.

Later in 2023, we will publish the final draft Local Plan and you will be able to make further comments before the plan is submitted to be examined by the planning inspector.

Kind regards,

Victoria Asimaki

Principal Policy Officer (Engagement)
Canterbury City Council
