## Proposed Development of Brooklands Farm

I strongly object to the above proposal.

Firstly the sewerage system could not cope & secondly the flooding in the local area would increase. Also there are not enough doctors hospitals & schools to cope with the proposed influx & roads round here were not built for such a large increase in the volume of traffic. There is already a large building project under way on the Thonet Way.

~~We would also have more water problems in supply and yet more sewerage would end up in the sea. The loss of agricultural land would be very regrettable to say nothing of the loss of wild life - hedgehogs frogs toads & bats but to mention but a few together with a green landscape~~

There would also be years of building work noise & heavy goods vehicles all changing the quiet way of life we enjoy round here & a reason for moving here in the first place.

Please please think again  
yours sincerely
