Subject: Local Plan Project 2045

I am devastated by your future plans for Canterbury and local district, I do understand Canterbury has issues with traffic but this plan is absolutely ridiculous. It would create more pollution, have no regard to the surrounding countryside around Canterbury, and destroy local communities.

The 5 Zones restricts free movement for the local public to access different parts of Canterbury, not everyone wants to walk, bike or use public transport and it has absolutely no consideration for different generations. The fact that you would be fined is staggering and completely takes away a basic human right which is FREEDOM. Canterbury is not a military state but a English city which should be accessed and enjoyed by all residents in and around it and if these plans go a Head(which I hope they never do) you are destroying this right.

I particularly have concerns on the Eastern movement corridor (bypass) which would be far to close to Fordwich and destroy the unique small town also the amazing countryside with its various wildlife which must not be destroyed but left alone for the residents and future generations to enjoy.

I'm also intrigued how this is going to be paid for as at the moment Canterbury City Council are not funding basic priorities, such as improving the main town centre which looks badly neglected and badly needs investment (no more student accommodation) maintaining the roads which are full of potholes and address more amenities for all generations , so if you concentrate on these rather for Plan 2045 Canterbury once again could be a lovely City again which sadly it is not now.
