

8 / 1 / 2023

Dear sir/madam

Where is the infrastructure to support a new 17000 housing estate. Where is the new sewage treatment works to support the estate? - Where is the new water reservoir for all the houses? - Who will be paying for the vital necessities.

~~How~~ will Canterbury cope with the massive influx of so many new homes, built in this area to provide health care, schools, jobs for so many families.

Surely this proposal is ludicrous to build our prime agriculture land and obliterate our rapidly disappearing open country spaces. I can't imagine having no relief from endless streets and endless urban sprawl. No open spaces, how can you allow this ruination of our 'Garden of England'? Please think of what you are destroying. This must be purely for financial gain. Please don't build here. Surely we have enough houses here, already, with the present fiscal of 2023.

yours faithfully

I look forward to hearing your reply.
