Draft Local Plan to 2045

Hi,

As a Local Resident, I have to object to several aspects of the plan:

1. Policy C6: Merton Farm - this is a really nice bit of countryside that is great for walks for local residents and to get out of the centre. Ripping this all up for a development will ruin the area and lower the character of Wincheap so I strongly object to this.
2. Wincheap Gyratory - with the existing "consultation" this scheme doesn't have any new pedestrian crossings on the industrial estate but routes traffic coming into canterbury through it. I think more pedestrian/cycle provision for crossing the roads will have to be provided here and object to this and any development that doesn't take this into account
3. Splitting the city into districts you can't drive between - this is madness. This policy should be built once the infrastructure is in place or available - I strongly object to this ill thought out policy. Something really good could replace this; I am a driver, but also a keen walker and would usually walk into the city centre, etc - there has to be a better way!

Best Regards,
Josh
