Having studied your plan for the development including above Farmland, I object to this development on the following grounds:

1. Brooklands Farm is an historic working farm and should not be used for housing.
2. The development will completely change the character of the area which is predominantly rural.
3. Our air quality has deteriorated over the years already by being between two major roads and Industrial estates.
4. South Street FLOODING is a regular occurrence by the brook, and Chestfield road under the flyover.
5. Increase in traffic in what is a quiet Country road will not be acceptable, any large replacement road will change the character of the whole area.
6. Our Country is OVERCROWDED now, services are failing, NHS failing. Roads overcrowded. Enough is enough.

Please lodge this objection and take into consideration before allowing this development.

Regards
J. Ponder
