I write as a great supporter for the Natural World and its preservation. As a member and lover of Hambrook Marshes, I am writing to point out some potential dangerous omissions in the Natural Environment and Open Space topic paper.

It seems to have been forgotten that the planning permission for a P&R on this site was revoked in October 2020.

There is no mention of a designated strip along the river in the Wincheap Water meadows either. These omissions could prove to be an unfortunate inaccuracy in the future for anyone who cares about the Wincheap water meadows and the Marshes. I would ask you to correct these immediately.

It is a great shame that everyone who is working so hard to retain this important area of land for both historical and environmental reasons should have to fight every step of the way without any support from our City Council.

Hazel Bielby.
