I've lived in Canterbury for over 60 years and I have yet to see any development as bad for the area as this one. Even the horrific over-development of the area behind Thanington.

The "Merton" proposal will irreparably damage the environment to the Southwest of Canterbury and lead to loss of open space and amenity.

The resulting traffic will blight the entire city and make life for all much more difficult and expensive.

I'm shocked that such an attractive green area could ever be considered for the developers to ruin. The city cannot afford to lose another green lung.

David Goddard
