Dear sir or Madame.

I would like to dates the issues that should be made known regarding your housing proposition to build some 200+ homes in adisham, womenswold, Ashford and other areas as outlined in R1, R20 and R22.

*loss of farm land and agricultural soil that is desperately needed in the production of food and fresh produce that will be unrecoverable after it has been paved over.

*water treatment will not be able to accommodate the proposed number of houses and sewage water will pollute fresh water sources.

*damage to England's natural countryside and the loss of numerous species that will not be able to cope with the loss of their habitat.

*a strain on the economy, you will not be able to accumulate enough mortgage or tenants to match the amount of resources and funds you will expend, every house will be empty for the foreseeable future due to a lack of income. You will not make nearly enough money to compensate for what you plan to do, it is an economic and ecological mistake.

Your decision while good natured and with people in mind is only promoting itself as self serving and will hold nothing but losses for Canterbury, the United Kingdom and it's already overburdened population and struggling economy.

Thank you for your time.

Kind regards

Robert Alexander dye.
