**Proposed 4 no. industrial units with associated parking.
Land North of Thanet Way A2990, Chestfield, CT5 3JB**

I would like to comment on the sustainable transport elements of this planning application.

The development includes secure and weatherproof cycle parking which is welcome.

I note that the access onto the Thanet Way includes dropped kerbs and a widened footway over a short length. I would ask that the footway is widened from Chestfield roundabout to provide a short cycle link to the site. A cycle route is already provided at the roundabout, and the link from here to the site would allow staff and customers to access the site safely by cycle.
