Merton lane development

To whom it may concern,

I have found out about a proposed development, policy c6 at Merton lane. I am really concerned about the choice of this location. This area is used regularly by a large numbers of walkers, runners, children, dog walkers. I am concerned that the quality of life of those that live in Canterbury is being effected by the vast and fast development of these areas. Green spaces, and a sense of freedom are important to people's well-being and by building on all green spaces this will effect people's well-being and in turn will then cost society money doing with these issues through health services. I understand that there is a need to build affordable homes for people to live in but these homes should not be at the sacrifice of people being able to access green spaces to exercise in. The only other available area near by is the Chatham path which is jammed packed at the weekend because the area already lacks well sized green spaces.

Please reconsider

Thanks

Anna
