Flood Zone 3B

Functional Floodplain (1 in 30 year)

Indicative Functional Floodplain (1 in 20 year or 1 in 50 year)

1 in 50 year (HC sensitivity results)

DETAILS

The model data used to produce the maps have been released prior to the updates to the functional floodplain definition (FZ3b). As such, detailed flood extents are not available for all areas shown to be affected by flooding. Where this is the case, the 1 in 20 year (for the Lower Stour) or 1 in 50 year flood extent (for all other models) has been used to represent an indicative FZ3b. For Canterbury City Centre, the parts of the Great Stour provided by the EA model covering the city centre and surrounding areas has been sensitivity tested and the results considered to be more realistic have also been shown in the mapping. The extent shown relates to the 1 in 50 year flood event. In some cases, available model data overlaps. Where this is the case, the most recent model data should be referenced. It may be necessary to undertake a Flood Risk Assessment to determine the most appropriate approach.
