To whom it may concern,
I have lived in Thanington for 22 years and regularly pass the Thanington recreation ground. It is a much used space by all ages from the community.
It is a most welcome green space situated in an urban area.

Yet again our community is facing the appalling proposed plan to build over this area. There is overwhelming evidence that green spaces are essential in urban areas for leisure, health and wellbeing. Green spaces also absorb carbon dioxide helping to mitigate the effects of climate change. Taking away this resource could lead to more anti-social behaviour as young people are forced out onto the streets.
The impact of increase in traffic onto Ashford Road would contribute more problems to an already congested area.

No part of this proposed plan enhances or improves Thanington.
I completely object to the proposed plan.

Yours sincerely,
Jill Cutting
