I wish to object to the proposal to build a park and ride on the Thanington recreation ground. This space is one of the few remaining areas where local children, families, and residents can enjoy sport, play, and relaxation. To cover it with concrete would take away a much-loved community resource that cannot be replaced.

The plan also poses serious environmental risks: more air and noise pollution, the loss of valuable green space and wildlife habitat, and increased flooding risk. These harms far outweigh any supposed benefit.

There are other, more suitable locations for such a development that would not strip the community of vital open space. I urge you to reconsider this damaging proposal and preserve the recreation ground for the wellbeing of current and future generations.
