Good evening,

I have come to an understanding that the multi purpose recreation ground in Thanington without is under threat to be converted into a car park. Alongside myself all the people i have grown up with are very irritated to hear this news from the moment i could walk i spent a large portion of my childhood playing rounders and other sports with my family. This is where i found my love and passion for rugby which i am now starting to progress and get to a higher level of taking the rec from us means you are taking a large portion of the young and older people of thaningtons' memories. This is our space for socialisation which is a key aspect to human nature. We have a large reputation in Thanington for being 'rough' if we and the young people are now seen hanging around a car park we will be deemed as trouble and misbehaved for wanting out space. As a group of youths that love our home we have started trying to clean thanington clearing up the litter as a start making it a nicer place for ourselves and everyone else. i hope you see our perspective and let us have our social space.

Many thanks,
Holly Adams
