

6.10.25.

Policy C. 12.

I would like to make three extra points against the development of the land in most countrys, not just Kent.

1. We are an ageing population, in a short while there will be hundreds of properties on the market. Leading to lower prices.
2. Most universities have built large blocks of Student Accommodation. With ^{FEWER} ~~from~~ students from abroad and more students saying no. to huge debts, lots of smaller houses which were Student-Lets, will become available.
3. In my view the most important.

Having experienced rationing as a child in the London area and knowing the enormous loss of shipping bringing us food, we should be doing every thing to encourage our farmers to supply most of our own food. We should not be reliant on cheap food from abroad. This supply will stop in the future or we will have third rate glut offerings.

The Green Belt. Woodlands and fields should all be protected.

I thank you if you have read my letter
yours sincerely
