Dear Team

I object to the local plans for the proposed development's surrounding Whitstable site's N20, N21 N23 and N24.

My main issue is that on the 30th of June and 1st of July 2025, South East Water admitted that because of the high temperatures and the extra demand,

Many taps ran dry. Bottled water had to be distributed from Sainsbury's car park, Chestfield

If South East Water struggle to cope at every spell of high temperatures with the existing demand, how will they cope with all this extra demand. With climate change predicted, these spells of hot weather could be more prolonged in the future.

Kind regards

Michael Golding
