Dear Sirs,

I am a longstanding member of the Stour Fishery Association. I am also a keen environmentalist. This development should only proceed if careful regard is had to the banks adjoining the Mill , Chartham /Tonford. Smoothing and levelling of the flow will allow safe egress for migratory fish such as Sea Trout and Salmon and encourage their return and migration in greater numbers and ensure more breeding success. This is not to enable catching these wonderful fish but to salute their return, which would be a great tribute to Canterbury and Kent.

I do hope that the City of Canterbury and other agencies will have regard to this submission for the betterment of Kent and its ecology.

Yours Sincerely,

Ben Moorhead DL
