Dear Canterbury Council

I am writing to voice my concern over the proposed development of 165 homes at Chartham Mill.

I am a member of the SFA and am aware of the fragile nature of the Stour and many chalk streams throughout the country.

The importance of this waterway to the Stour Valley, its population and unique habitat is crucial. The river is already under huge pressure from pollutants, water extraction, human interference and climate change. In addition what plans are there for wiers, culverts and sluices and the effects on the migratory fish that run the river? Do you have a clear outline and the expert advice needed to outline the effects of such a development?

I lokk forward to your reply

Yours sincerely

Stephen Sidwell
