This proposal for 170 houses on this Greenfield site is completely inappropriate for this site, at present the village of Chartham will not be able to cope in multiple ways, roads are in many cases single track due to park vehicles the roads and are in need of repair many have no pavements to access local amenities which impacts on health and safety to both humans and animals. Education will require in the main transport to Canterbury causing more vehicles on the already congested roads. The primary school will not have sufficient places for a large number of children that is inevitable with such a large construction of new houses.

Access from the A28 is hazardous most of the time and the use of shortcuts from Wincheap and Thanington through to Cockerling Road will cause disruption and safety issues.

We need to conserve our farmland and green spaces and help to protect our villages status.

Finally what strain will be put onto our water, sewage and waste disposal that appear to be under strain already and remember the flood risk which could cause flooding in the City of Canterbury Thank you for your attention to this email Janet Clover
